## Office Action Summary

Application No.

09/937,114

Applicant(s)

BARTLETT ET AL.

Examiner

Krishnan S. Menon

Art Unit

1723

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 11 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1,2,5-8 and 10-13 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1,2,5-8, and 10-13 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

### DETAILED ACTION

Claims 1,2,5-8, and 10-13 are pending after the amendment of 8/11/05.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 2 and 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Rogemont et al (US 4,701,234).

Rogemont teaches a permeable mesh comprising plurality of openings in a screen having uniform thickness, one or more ports and integral gasket of thermoplastic elastomer with gasket around the ports and extending beyond the screen surfaces as claimed – see abstract, column 1 lines 15-52, column 3 lines 20-30, column 4 lines 28-33 and figures. The extension of the gasket above the mesh falls within the range claimed in claims 5-8. See column 4 lines 28-35.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1723

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 USC 103(a) as unpatentable over Van Hoek et al (US 2,758,083) in view of Rogemont et al (US 4,701,234).

Claim 1 recites a filtration device comprising one or more filter layers, with the filter as having one or more openings around which a fluid tight seal is formed by an integral seal that is formed through the filter, with thickness greater than the filter, and made of an elastomer. Van Hoek teaches a filtration (electrodialysis) device with filter membranes having openings (and having mesh screens between the filter membranes) which are sealed around (see figures 2-9) by adhesive filling or heat sealing with the thermoplastic membrane through the mesh screen (col 3 lines 49-52) or compression with elastomeric seal devices (col 4 lines 53, fig 7). The holes thus have integral gasket seal (formed from the adhesive or the membrane material) in the screen layer (31-figure 3) with thermoplastic material. However, this would not extend beyond the membrane surface as claimed. Rogemont teaches ports around the filter screens (column 1 lines 19-31) which are sealed by integrally formed thermoplastic elastomers, the gasket extending beyond the surface of the screens (col 1 lines 50-67). It would be obvious to one of ordinary skill in the art at the time of invention to use the teaching of Rogemont in the teaching of Van Hoek to improve the quality of the seal, uniform contours around the holes, and uniform thickness without significant variation as taught by Rogemont.

Art Unit: 1723

3. Claims 10 –13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rogemont et al (US 4,701,234) in view of Van Hoek et al (US 2,758,083)

Rogemont teaches a permeable mesh comprising plurality of openings in a screen having uniform thickness and one or more ports and integral gasket of thermoplastic elastomer around the ports with gasket extending beyond the screen surfaces as claimed – see abstract, column 1 lines 15-52, column 3 lines 20-30, column 4 lines 28-33 and figures. The extension of the gasket above the mesh falls within the range claimed in claims 11-13. See column 4 lines 28-35.

Rogemont teaches that the mesh is for making microfiltration, ultrafiltration or dialysis devices (abstract), but does not teach the specific details of such devices as claimed, such as the layers of the membranes and the feed and filtrate screens. However, such details would be known to one of ordinary skill in the art, or at least the teachings of Rogemont has such an expectation. Also, one of ordinary skill in the art would use the teachings of a reference such as Van Hoek for making an electrodialyser, for example, using the teaching of Rogemont.

### ***Response to Arguments***

Applicant's arguments re the pending claims are moot – new grounds for rejection.

### ***Conclusion***

This is in response to an RCE and is made non-final due to the new grounds of rejection.

Art Unit: 1723

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Krishnan S. Menon whose telephone number is 571-272-1143. The examiner can normally be reached on 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda L. Walker can be reached on 571-272-1151. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
